PROFESSIONAL SUMMARY

Lead Product Designer with 5+ years specializing in AI-powered healthcare and enterprise SaaS. Experienced in leading zero-to-one initiatives across AI-assisted workflows, intelligent scheduling, and operational UX with a focus on trust, usability, and scalable adoption.

WORK EXPERIENCE

Innovaccer

Lead Product Designer

Jun 2024 – Present

- Led the product vision and UX strategy for integrating Sara AI into contact center workflows — including patient insight cards, real-time call assistance, and automated post-call documentation — reducing average handle time by 20% and improving first-call resolution by 25%.
- Led on-site workshops and cross-functional alignment in the US with product, design, and engineering leadership to define AI goals and influence roadmap priorities across referral management and contact center workflows.
- Mentored designers and led the Reimagine contact center with AI initiative, delivering a live AI-powered demo experience for enterprise customer presentations.

Senior Product Designer

Jan 2023 – May 2024

- Defined the UX strategy for an AI-assisted appointment scheduling MVP, addressing low first-attempt booking success rates and reducing provider back-and-forth, resulting in improved appointment completion rates.
- Redesigned the flagship calling application through multiple rounds of user research and iteration, resulting in a 40% improvement in user CSAT.
- Built a unified patient profile consolidating information from fragmented systems into a single agent view, contributing to a 30% improvement in agent productivity.

Product Designer

Aug 2021 – Dec 2022

- Ran usability studies with B2B users, driving design changes that increased user acceptance by 18%.
- Designed core workflows for the contact center calling application, translating requirements from product and engineering into wireframes, user flows, and high-fidelity prototypes in Figma.

Deloitte US India

Associate Solution Advisor

Jul 2018 – Jul 2021

- Transitioned to UX towards the end of 2020 where I collaborated with the UX team to propose key screen flows for a low-code development tool, contributing to a 10% reduction in workflow complexity.
